- **Web Performance Optimization:** Image optimization, Lazy loading
- **UI/UX Design:** Wireframing, Prototyping
- **Soft Skills:** Communication, Teamwork, Problem-Solving, Time Management, Adaptability, Leadership, Creativity, Attention to Detail, Customer Service

## Projects

### Freelance Web Development & NFT Artworks

Website: <https://pixel-b.web.app/>

This is where my **passion** enlightened. While working on NFTs with a group of my friends, I did not really get much work and in my free-time I used to skim through HTML projects I used to make in Grade 5. During the time I had, I would slightly improve these websites. Soon my friend asked if you know website making and I instantly said “Yes” not really knowing what was to come. Each obstacle gave me an **opportunity** to learn and soon each aspect of **curiosity** became a stream of my **front-end development** hierarchy and today I truly love what I do.

### Portfolio Website

Website: <https://arsalan-27.web.app/>

This is where I have portrayed the varying **interests** and **expertise** I possess regarding myself and my work with a website that is not only **pleasing** and **effective** but also **responsive** and **efficient**. It came with a series of draft with this being the current one until I come up with another set of skills and work on a new version of it.

### Business Websites

Website: <https://emaarsexpo.web.app/> & <https://posh-attire.web.app/>

PixelByte is the NFT business my friend work on, and I feel extremely proud as it was my **first** and yet my **most prominent** project. It took me three iterations before running my current one and it goes to show how much effort it takes to make a website as vital as such and how much a person can **learn** in a matter of months. It did not limit me either. Soon I made 2 client their import/export business website that itself taught me the essence of a **team**. I worked with designer and the client himself to make sure that the project looks just perfect.

## Work Experience

### Graphic Designer (at NUST Society of Artificial Intelligence)

*National University of Sciences and Technology (NUST)*

*10/2024 – Present | Islamabad, Pakistan*

- Provided graphic design services for events and campaigns, contributing to promotional efforts and digital marketing initiatives.
